

# Residential Porch-Lift® Vertical Platform Lift

While the lift is in motion, the ramp folds. Once it arrives at a lower landing, one side will lower, allowing easy access.

(shown with optional fascia panel)

## Convenient access to your home without unsightly, space consuming ramps

Porch-Lift platform has a non-skid surface that comes standard with an automatic folding ramp.

*(shown with optional fascia panel)*

Spending time with your loved ones in the home you cherish is important. So when stairs become a barrier, homeowners across America turn to ThyssenKrupp Access for solutions that add value to their independent lifestyle—both indoors and outdoors.

There are multiple safety features built into each lift. Sensors even detect when an object is blocking its path, stopping the lift until the path is clear.

### Convenience

Whether you want to get past one step on your porch or enjoy the scenery from your back deck, the Porch-Lift® wheelchair lift offers a smooth, quiet ride. The stylish, compact design affords plenty of room on the non-skid platform, while maximizing valuable living space.

### Low Maintenance

The Porch-Lift is easy to own. It is low maintenance and features a durable powdercoat finish, making it weather resistant. A Porch-Lift can be a more cost-effective alternative to space-hogging ramps, and you'll never have to shovel snow and ice down a slippery slope.

### Safety

We engineer all of our lifts for your safety and comfort, following the same exacting standards for home models as our commercial grade units. Why give up a great home just because of a few stairs? Turn to ThyssenKrupp Access for complete solutions that open your home to you.

Optional remote controls mounted at each level ensure that your lift will be exactly where you want it at the push of a button.

Control panel features constant pressure control toggle, key lock and backup emergency stop button.

Choose an optional gate at the upper landing. Its VDR® mechanical interlock prevents the lift from operation until the gate is closed and locked.
